

Stingray - Feedback

Fix up of last deliverable

✱ Input Documentation

Fine.

※ How to use with other systems

Could do with examples like with JS or Python or Ruby; bigger ticket players than just CURL

✱ Output documentation

Fine

✱ Output Correctness

Fine.

※ Log File

Fine.

※ Ease of API Use

Fine

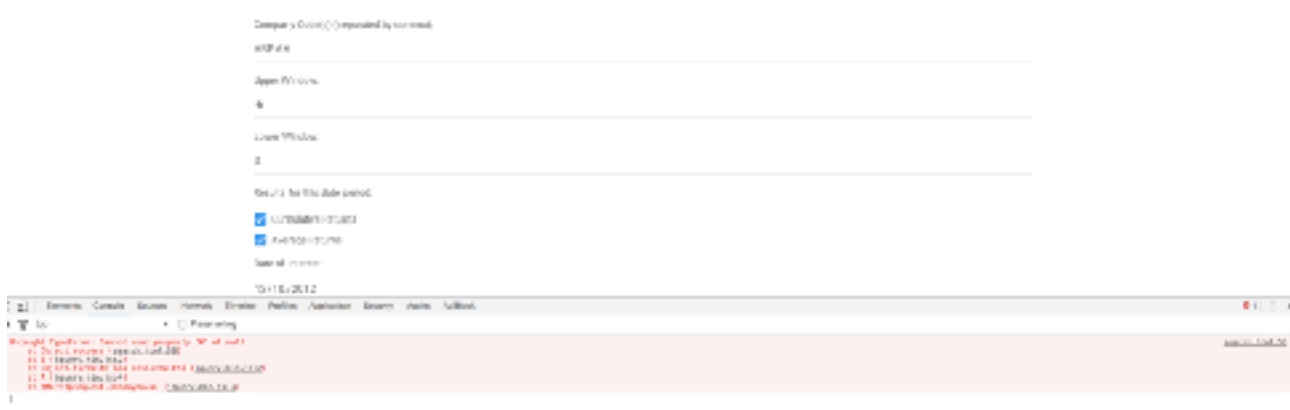

※ Date and version of release

Fine

✖Implementation / Changelog

Fine

GUI

Try handle issues like this more gracefully. Normal users wont see these errors.

Form is fine.

Representation of Data

While you have shown the data, it's pretty full on to look at. The data is not distinct from one another in terms of columns and maybe cap those decimals or at least let the user decide the precision.

Also the graph at the bottom could be missed in the presence of 1000s of rows Maybe wack it near the top.

Instead of highlighting the line , maybe allow the addition and subtraction of lines for clarity.

Also using the scroll to magnify the graph is kinda trippy.
